**OKK A DIVERSIFIED MANUFACTURER OF MACHINE TOOLS**

**Specializes In:**

- Machining centers
- Graphite cutting machining centers
- Grinding centers
- CNC Milling machines
- Conventional milling machines
- Total die and mold making systems
- Flexible manufacturing cells and systems

**Other Products Include:**

- Textile Machinery
- Water Maters

<b>KCV800-5AX</b>	<b>29</b>
<b>KCV1000-5AX</b>	<b>29</b>

Intensive machining enables shorter lead times.

No accumulation of errors through multiple setup operations improves machining accuracy.

Tilting a workpiece or a tool requires less extension of a tool. Also, it allows the use of optimum rpm/ cutting speed for the tip of the tool.

In the 3-axis machining for prototype or die fabrication, long extension of a tool has been needed. However, the 5-axis machining requires reduced extension of a tool and can improve accuracy and quality of machining. Also, it greatly reduces the time required for machining and enables highly efficient machining.

3-axis machining

Highly efficient 5-axis machining requiring less extension of a tool

Intensive machining can reduce costs for preparing fixtures.

This enables the machining of complex shapes such as impellers.

# 5AX

# HM-X6000

HM-X6000

## Exceptionally Efficient Machining of Complex Parts for Aircraft and Automotive Industries

OKK integrated the developed 5-axis vertical machining centers technologies and the HM-series highly rigid horizontal machining centers.

- Machining from roughing through finishing are combined and completed in a single chucking.
- Maximum machining size (diameter × height) :  $\phi 750 \times 700$  mm ( $\phi 29.53" \times 27.56"$ )
- The large trunion table produces highly rigid and accurate machining.

### Exceptional Rigidity and Accuracy

#### New Innovative Trunion Table Mechanism

The solid dual-disc clamping method of the Trunion table ensures the braking retaining force of 10000 N·m (7376 ft·lbs) for the A axis and 6800 N·m (5015 ft·lbs) for the B axis.

The double (hydraulic and mechanical) clamping method applied to the pallet clamping ensures the clamping force of 96000 N (21600 lbf) and provides safety at the time of the power failure.

The standard rotary scale feedback encoder on the A and B axes of the Trunion table maximizes the indexing accuracy.

Drive of the Trunion table was changed to the new rolling type from the conventional slide type. The non-backlash mechanism was applied to the tilting axis to improve the indexing accuracy.

#### High-powered Head interlock with Machine's High Rigidity

High-power machining is enabled with the high-torque BT50 MS spindle.

Spindle taper	No.50
Spindle motor	30 / 25 kW (40 / 34 HP)
Maximum torque	420N·m (310 ft·lbs) OP : 600N·m (443 ft·lbs)
Spindle diameter	$\phi 100$ mm ( $\phi 3.94"$ )

#### Chip Processing Measures

The scattered chips on the splash guard are prevented from accumulating by the use of the shower nozzles on the ceiling (ceiling shower: option, std US) and removed through the coil-type chip conveyors on the right and left sides. The steeply inclined wall structure of the splash guards, i.e. large inclination angle of the telescopic cover and the top faces of the machine, deter chips from accumulating.

Ceiling shower (option, std US)

Lift-up type chip conveyor (option)

Coil type chip conveyor

## Accuracy

### Positioning Accuracy (without linear scale) mm (inch)

Positioning Accuracy (X, Y, Z) ±0.0020 (±0.00008")/full length

Repeatability (X, Y, Z) ±0.0010 (±0.00004")/full length

### Positioning Accuracy (with linear scale) (OKK tolerance) mm (inch)

Positioning Accuracy (X, Y, Z) ±0.0010 (±0.00004")/full length

Repeatability (X, Y, Z) ±0.0005 (±0.00002")/full length

### Positioning Accuracy (with encoder) (OKK tolerance) mm (inch)

Positioning Accuracy A axis: ±5 sec C axis: ±3 sec

### Cutting Accuracy mm (inch)

Item	OKK tolerance	Result
Axis direction	0.015 (0.00059")	0.003 (0.00012")
Diagonal direction	0.015 (0.00059")	0.005 (0.00020")
Deviation of hole dia	0.010 (0.00039")	0.005 (0.00020")

### Circular Cutting Accuracy mm (inch)

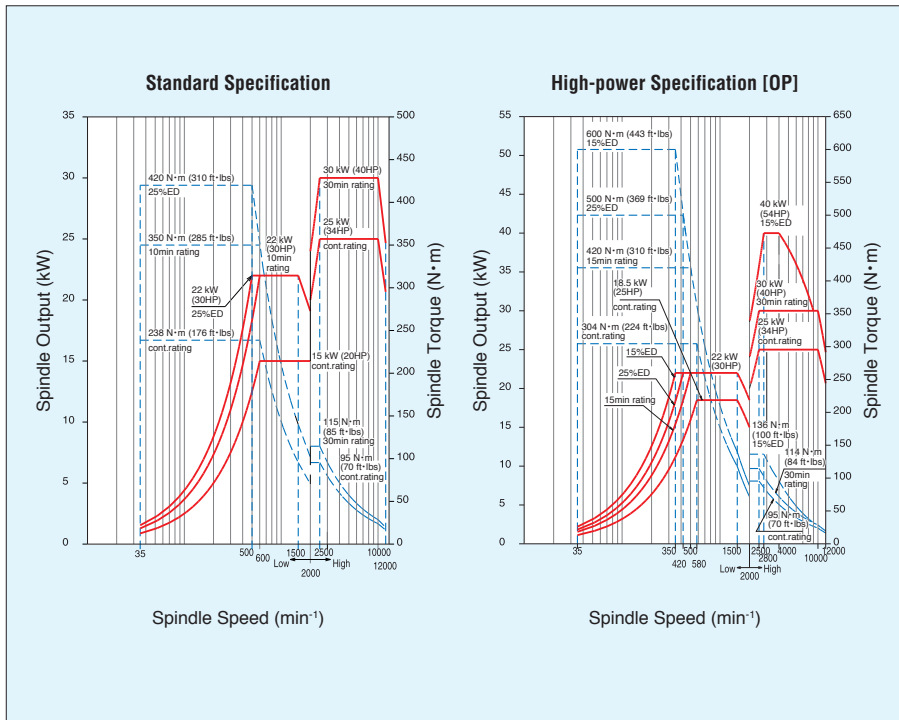

Item	OKK tolerance	Result
Circularity	0.005 (0.00020")	0.004 (0.00016")

#### Remarks

- \*1: The above sample data shows a short-time machining example and the results of continuous machining may differ from them.
- \*2: The above sample data shows the accuracy under OKK's in-house cutting test conditions. The results may vary with the conditions of the cutting tools and fixtures.
- \*3: The accuracy shown above are values obtained based on OKK's inspection standards under the conditions that the machine is installed according to OKK's foundation drawing and the ambient temperature remains constant.

Automatic tool changer (ATC)	Type of tool shank (Nominal number)	JIS B 6339 BT50
	Type of pull stud (Nominal number)	OKK only 90°
	Number of stored tools	tools 40 <sup>※2</sup>
	Maximum tool diameter (With tools in adjacent pots)	mm φ115(φ4.53")
	Maximum tool diameter (With no tools in adjacent pots)	mm φ270(φ10.63")
	Maximum tool length (from the gauge line)	mm 500(19.69")
	Maximum tool weight	kg 25(55lbs)
	Tool selection method	Address fixed random method
	Tool exchange time (tool-to-tool)	sec 2.0
	Tool exchange time (cut-to-cut)	sec 4.2
Motor	For spindle (30-min rating / continuous rating)	kW 30/25(40/34HP)
	For feed axes	XYZ: kW FANUC XYZ.5.5(7HP) AB: kW FANUC A.5.5(7HP) B:4.5(6HP)
Required power source	Power supply	kVA FANUC:76
	Supply voltage and supply frequency	V × Hz AC200±10% × 50/60±1 AC220±10% × 60±1 <sup>※3</sup>
	Compressed air supply pressure	Mpa 0.4 to 0.6(58 to 87psi) <sup>※4</sup>
Capacity of tank	Air supply flow rate	L/min(ANR) 500(132gpm) <sup>※5</sup>
	For coolant	L 400(106gal)
	For spindle head cooling	L 72(19gal)
Dimensions of Machine	For hydraulic unit	L 20(5gal)
	Height of Machine (from floor level)	mm 3430(135.04")
	Floor space required for operation (width × depth)	mm 3905(153.74") × 5450(214.57")
Controller	Floor space including maintenance area (width × depth)	mm 5100(200.79") × 6300(248.03")
	Weight of Machine	kg 20000(44100lbs)
	Operating environment temperature	℃ FANUC 3li-A5 5 to 40

※1: Under the HQ or hyper HQ control  
 ※2: Number of stored tools refers a total number of tools including the one installed on the spindle i.e. subtract one from the above for the actual number of tools stored in the tool magazine.  
 ※3: When the supply voltage is 220 VAC, the supply frequency of 60 Hz only is applicable.  
 ※4: Purity of the supplied air should be equivalent to Class 3.5.4 specified in ISO 8573-1 / JIS B8392-1 or higher.  
 ※5: The flow rate for the standard specification machines is specified in the above.  
 When optional specification such as an air blow is added, add the corresponding air supply according to the operating frequency.

**Standard Accessories**

**HM-X6000**

Item	Q'ty
Lighting unit with one fluorescent lamp	1 set
Two-lamp-type signal lamp	1 set
Coolant unit with separate-type coolant tank	1 set
Ceiling cover / APC safety guard	1 set
Door interlock control	1 set
Slideway protection covers for X, Y and Z axes	1 set
Spindle air purge	1 set
Spindle head and ball screw cooling oil temperature controller	1 set
Hydraulic unit	1 set
Coil-type chip conveyor	2 sets
Edge locator	1 set
Automatic pallet changer (2APC)	1 set
Oil-air unit	1 set
Steps (before the operation panel)	1 set

# VG5000

## Debut of Highly Rigid 5-axis Controlled Machining Center!

Designed for machining hard-to-cut materials such as stainless steel and titanium alloy.

Complete roughing to finishing operations in a single chucking. Responds to all users' needs and achieves highly efficient and accurate machining through intensive machining even when machining aircraft parts, die components and so on.

### Titanium Material Sample Workpiece

Material: Titanium  
Coolant: Water-soluble coolant  
Tooling:  $\phi 10 \sim 50\text{mm}$  ( $\phi 0.39 \sim 1.97''$ ) end mill  
Cutting condition: S380  $\sim$  S6000  
F120  $\sim$  F2000  
Cutting time: 3 hours 20 minutes

- The tilt and rotary structure built in the table delivers the multiple surface machining and the simultaneous 5-axis controlled machining capability.
- The No.50 taper spindle can cover the machining of heavy-duty cutting at low speed through high-speed cutting.
- Drastically improved access to and operation of workpieces.
- Vastly improved performance in removal of chips from around the table.

※ The machines in the photographs of this brochure may include optional accessories.

VG5000

### Highly Rigid Main Body Structure

In order to ensure high rigidity and to improve the dampening performance for vibrations generated while machining, the bed and column structure are constructed of triangular ribs arranged to optimize the casting strength through FEM models.

### High-speed and Highly Rigid Spindle

The No. 50, 7/24 taper spindle nose is used in combination with the 100mm(3.94") inner diameter, four-row combination angular bearing. The spindle rotating range is 35~12000min<sup>-1</sup>. Roughing and heavy-duty cutting of hard-to process materials are enabled due to the built-in motor that can output a maximum 600 N·m (450ft·lbs) (15% ED).

### Feed Guide Face

Use of the highly rigid, large-size linear roller guide improves vibration dampening of the feed system.

### Table

To deliver driving torque, the drive sections of the tilt and rotary axes adopt the mechanism of 1/180 (A axis), 1/120 (C axis) reduction ratio worm gears. 3870 N·m (2902 ft·lbs) clamping torque in the rotary axis assures rigidity in indexing and machining of multiple surfaces. With the brake mechanism on both sides, 5340 N·m (4005 ft·lbs) brake torque is achieved on the tilt axis.

### APC (Automatic Pallet Changer) is included in the Standard Specification!

Arranging the APC in the rear of the machine not only ensures operability and accessibility of operators but improves visibility of workpiece machining area. At the same time it achieves a compact floor space design (saves about 20% of space compared with our conventional machines).

In addition to the APC included in the standard specification, the conveyor installed inside the machine processes chips completely and thus saves manpower and supports unmanned operation.

## Accuracy

### Positioning Accuracy (without linear scale)

Item	mm (inch)
Positioning Accuracy (X, Y, Z)	±0.0020 (±0.00008") /full stroke
Repeatability (X, Y, Z)	±0.0010 (±0.00004") /full stroke

(OKK tolerance)

### Positioning Accuracy (with linear scale)

Item	mm (inch)
Positioning Accuracy (X, Y, Z)	±0.0010 (±0.00004") /full stroke
Repeatability (X, Y, Z)	±0.0005 (±0.00002") /full stroke

(OKK tolerance)

### Positioning Accuracy (with encoder)

Item	A axis: ±5 sec	C axis: ±3 sec
Positioning Accuracy		

(OKK tolerance)

Machine Size and Required Floor Space	Hydraulic unit tank	L 20 (5 gal)
	Machine height from the floor surface	mm 3875 (152.56")
	Floor space required for operation (width × depth)	mm 3794 × 4260 (149.37" × 167.72")
	Floor space including maintenance area (width × depth)	mm 4600 × 5000 (181.10" × 196.85")
Controller type	Machine weight	kg 25000 (55100 lbs)
	Temperature of operation environment	°C FANUC 3ii-A5 5 to 40

\*1: Under the HQ or Hyper HQ control  
 \*2: The number of stored tools refers a total number of tools including the one installed on the spindle i.e. subtract one from the above for the actual number of tools stored in the tool magazine.  
 \*3: When the supply voltage is 220VAC, the supply frequency of 60Hz only is applicable.  
 \*4: Purity of the supplied air should be equivalent to Class 3.5.4 specified in ISO 8573-1 / JIS B8392-1 or higher.  
 \*5: The flow rate for the standard specification machines is specified in the above.  
 When optional specification such as an air blow is added, add the corresponding air supply according to the operating frequency.

**Standard Accessories**

**VG5000**

Item	Q'ty
Lighting system (Two fluorescent lamps)	1 set
Coolant unit (Separate coolant tank)	1 set
Entire machine cover (Splash guard)	1 set
Door interlock control	1 set
Top cover	1 set
ATC shutter (operated automatically)	1 set
Slideway protection covers for X and Y axes	1 set
Spindle air purge	1 set
Spindle head and ball screw cooling oil temperature controller	1 set
Automatic grease lubrication unit	1 set
Hydraulic unit (for clamping the 5-axis table)	1 set
Coil-type chip conveyor	2 sets
Automatic pallet changer (2APC)	1 set
Leveling block	1 set
Foundation parts (Bond for anchoring is optional.)	1 set
Parts for machine transfer (excluding the hoisting jig)	1 set
Automatic power off	1 set
Electrical spare parts (fuses)	1 set
Instruction manual	1 set
Electrical manuals (including Hardware diagrams)	1 set

# VM-X5

For machining small-to-medium-sized turbine blades efficiently at high speed

**VM-X5/250B**

※ Machine picture includes optional accessories.

### Sample workpiece

Material: SUS304  
 Coolant: Water-soluble coolant  
 Tooling:  $\phi 25\text{mm}$  ( $\phi 0.98''$ ) end mill  
 $\phi 12\text{mm}$  ( $\phi 0.47''$ ) radius end mill  
 Cutting condition: S1500 ~ S6000  
 F2400

- The VM-X5 is the Perfect 5-axis machining center for blade machining having a tilting spindle (B axis) and rotary tables (A axis).
- Its high cutting performance is inherited from the VM5 III enabling shorter roughing times.
- The roller gear mechanism and the synchronized facing rotary tables on the machine generate no backlash and support high-precision machining.

## VM-X5

### Main body structure has excellent rigidity and vibration damping

- VM5 III base is box-way construction on the X, Y & Z axis delivering rigidity and excellent vibration dampening.
- The large diameter support bearings on the B axis maintain overall rigidity.
- Maximum 600mm (23.62") long blades can be machined.

### Machining an entire blade without reclamping

Large travel of the B axis and supporting both ends of a workpiece on the A axis enable machining the small to medium-size turbine blades completely from their roots to the blades without reclamping.

### Rotary table

A axis direct drive rotary table outputs zero backlash, agile response and tight accuracy. Optional dual drive synchronized rotaries eliminate work piece twisting.

### Tilting spindle

The roller gear mechanism used for driving the B axis combines the features of worm gear and rolling drive which supports the machine's high torque, high efficiency, smooth movements and high-precision machining.

90° ← → 90°

## Accuracy

### Positioning Accuracy (without linear scale) mm (inch)

Positioning Accuracy (X, Y, Z) ±0.0030 (±0.00012") /full stroke

Repeatability (X, Y, Z) ±0.0020 (±0.00008") /full stroke

(OKK tolerance)

### Positioning Accuracy (with linear scale) mm (inch)

Positioning Accuracy (X, Y, Z) ±0.0020 (±0.00020") /full stroke

Repeatability (X, Y, Z) ±0.0010 (±0.00004") /full stroke

(OKK tolerance)

### Positioning Accuracy (with encoder)

Positioning Accuracy A axis: ±5 sec C axis: ±3 sec

(OKK tolerance)

### Cutting Accuracy mm (inch)

Item	OKK tolerance	Result
Axis direction	0.015 (0.00059")	0.002 (0.00008")
Diagonal direction	0.015 (0.00059")	-0.005 (-0.00020")
Deviation of hole dia	0.010 (0.00039")	0.003 (0.00012")

### Circular Cutting Accuracy mm (inch)

Item	OKK tolerance	Result
Circularity	0.0150 (0.00059")	0.0055 (0.00022")

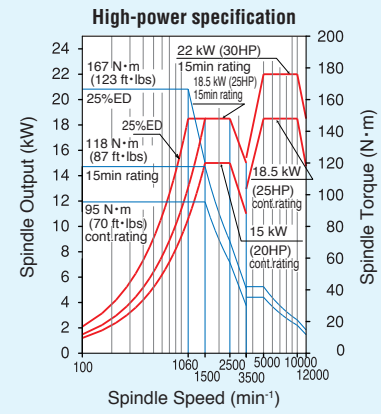

### Remarks

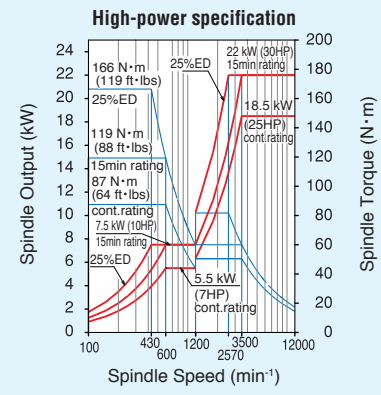

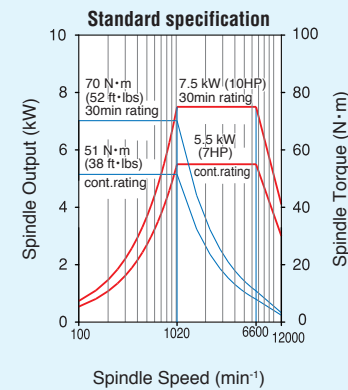

- \*1: The above sample data shows a short-time machining example and the results of continuous machining may differ from them.
- \*2: The above sample data shows the accuracy under OKK's in-house cutting test conditions. The results may vary with the conditions of the cutting tools and fixtures.
- \*3: The accuracy shown above are values obtained based on OKK's inspection standards under the conditions that the machine is installed according to OKK's foundation drawing and the ambient temperature remains constant.

### Table

### Rotary table

### When two Rotary tables are used

- Maximum workpiece length : 600[mm] (23.62")
  - Maximum workpiece diameter : φ250[mm] (φ9.84")
  - Maximum workpiece weight : 200[kg] (441lbs)
- (Workpiece both end must be fixed with Rotary table)  
(\* for a Rotary table 100[kg] (221lbs))

## Main Specifications

VM-X5

Item	Unit	Specification	
Travel	Travel on X axis (Table right / left)	620(24.41")	
	Travel on Y axis (Saddle back / forth)	450(17.72")	
	Travel on Z axis (Spindle head up / down)	510(20.08")	
	Travel on A axis (Table turning)	360 deg	
	Travel on C axis (Spindle head swiveling)	-90~90 deg	
Table	Distance from table top surface to spindle nose	290~800(11.42"~31.50")	
	Distance from column front to spindle center	524(20.63") [510(20.08")*1]	
	Table work surface area(X axis direction × Y axis direction)	1250×560(49.21"×22.05")	
	Max. workpiece weight loadable on table	800(1764lbs)	
Spindle	Table work surface configuration (T-slot nominal dimension × spacing × number of T slots)	18×110mm(4.33")×5	
	Distance to the table work surface from the floor	950(37.40")	
	Spindle speed	100~12000 min <sup>-1</sup>	
Feed Rate	Number of spindle speed change steps	Electric stepless speed change (MS)	
	Spindle nose (nominal number)	7/24 taper, No.40	
	Spindle bearing bore diameter	φ70(φ2.76")	
Automatic Tool Changer	Rapid traverse rate	X, Y and Z axes: m/min A and B axes: min <sup>-1</sup>	
	Cutting feed rate	X, Y and Z axes: mm/min A and B axes: min <sup>-1</sup>	
Motors	Tool shank (nominal number)	BT40 Dual contact tool	
	Pull stud (nominal number)	MAS 403 P40T-1	
	Number of stored tools	30	
	Max. tool diameter (with tools in adjacent pots)	φ80(φ3.15")	
	Max. tool diameter (with no tools in adjacent pots)	φ110(φ4.33")	
	Max. tool length (from gauge line)	280(11.02")	
	Maximum tool weight (moment)	10(22lbs) [9.8(7.2ft·lbs)]	
	Tool selection method	Memory random method	
	Tool exchange time (tool-to-tool)	5 sec	
	Tool exchange time (cut-to-cut)	15 sec	
Required Power Supply	for Spindle (30min rating/continuous rating)	kW 7.5/5.5(10/7HP)	
	for Feed axes	X, Y and Z axes	MITSUBISHI X/Y:2.0(2.7HP) Z:4.5(6HP) FANUC X/Y:3.0(4HP) Z:7.0(9.4HP)

- VC-X350L
- VC-X500
- VP9000-5AX

## Drastically reduced workpiece machining time

This specialized 5-axis machining center has been developed from OKK's advanced technologies. This machine eliminates loss of accuracy and burden on the operators caused by multi-setup operation and shortens lead time under process integration.

VC-X350

VC-X350L

VC-X500

VP9000-5AX

VC-X350	
Rapid traverse rate	50 m/min (1969ipm) (X and Y)
	36 m/min (1418 ipm) (Z)
Maximum feed acceleration	0.7 G
Spindle startup time	1.5 sec (0 → 12000 min <sup>-1</sup> )*
Tool exchange time	1.3 sec (Tool-to-tool)
	4.5 sec (Cut-to-cut)

\* Spindle motor 22/18.5kW (30/25HP): option

### High-speed Table Control

Delivering high-speed 5-axis machining of large 800mm (31.50") diameter workpieces by utilizing 25 min<sup>-1</sup> tilt axis feed and 50 min<sup>-1</sup> rotation axis feed. **VP9000-5AX**

### Wide selection of the spindle

Cutting performance is largely improved by the use of the motorized spindle (MS) which integrates a motor covering a wide and high output range. Acceleration time of the spindle can be as short as only 1.5 seconds (\*) from the non-operating state to the speed of 12000 min<sup>-1</sup>. High-speed spindle of 20000 min<sup>-1</sup> or 22/18.5kW (30/25HP) high-power spindle can also be adopted optionally.

\* Spindle motor 22/18.5kW (30/25HP): option

### Sample Workpiece

Material: SKD61  
Coolant: Water-soluble coolant  
Tooling: R2~5mm (R0.08 ~ 0.20") end mill  
Cutting condition: S6000 ~ S8000  
F1000 ~ F2400  
Cutting time: 8 hours 59 minutes

### Sample Workpiece

Material: A7075  
Coolant: Water-soluble coolant  
Tooling: φ10 ~ 25mm (φ0.39 ~ 0.98") end mill  
Cutting condition: S8000 ~ S12000  
F2400 ~ F8000  
Cutting time: 1 hour 30 minutes

※ The machines in the photographs of this brochure may include optional accessories.

## Accuracy

### Positioning Accuracy (without linear scale)

KCV1000-5AX

## Even large-sized aircraft parts can be machined at high speed and quite efficiently!

Tilting and swiveling structure of the spindle achieves 5-axis machining of large-sized workpieces.

High-speed and highly efficient machining of aluminum workpieces is possible with the excellent cutting performance of the No. 50 taper high-speed and high-power spindle.

Long table enables easy machining of long workpieces.

Easy access to the spindle and workpieces are ensured by the structure of traversing column.

Improved chip discharge mechanism enables processing a large amount of chips.

Tilting and swiveling structure of the spindle

Thorough measures to control thermal displacement

Thermal displacement caused by generation of heat on the bearing is suppressed by the spindle housing cooling mechanism. In addition, the machine has the core-chilled ball screws in the feed axes.

Comprehensive chip processing

Besides the standard coil-type chip conveyors front and back of the table, the machine has additional coil-type chip conveyors on the right and left of the column for improved chip processing capability. Chips on the front face of the column and both sides of the X-axis shutter are flushed out into the conveyors.

Movable operation panel

### Sample Workpiece

Material: Aluminum  
Coolant: Water-soluble coolant  
Tooling:  $\phi 50\text{mm}$  ( $\phi 1.97\text{''}$ ) end mill  
Cutting condition: S1000 ~ S6000

※ The machines in the photographs of this brochure may include optional accessories.

## Accuracy

### Positioning Accuracy (without linear scale) mm (inch)

	X	Y	Z
Positioning Accuracy	±0.0090 (±0.00035")	±0.0030 (±0.00012")	±0.0050 (±0.00020")
Repeatability	±0.0020 (±0.00008") /full stroke		

(OKK tolerance)

### Positioning Accuracy (with linear scale) mm (inch)

	X	Y	Z
Positioning Accuracy	±0.0060 (±0.00024")	±0.0020 (±0.00008")	±0.0030 (±0.00012")
Repeatability	±0.0010 (±0.00004") /full stroke		

(OKK tolerance)

### Positioning Accuracy (with encoder)

Positioning Accuracy	A axis: ±5 sec	B axis: ±5 sec
----------------------	----------------	----------------

(OKK tolerance)

### Cutting Accuracy mm (inch)

Item	OKK tolerance	Result
Axis direction	0.015 (0.00059")	0.007 (0.00028")
Diagonal direction	0.015 (0.00059")	0.008 (0.00031")
Deviation of hole dia	0.010 (0.00039")	0.005 (0.00020")

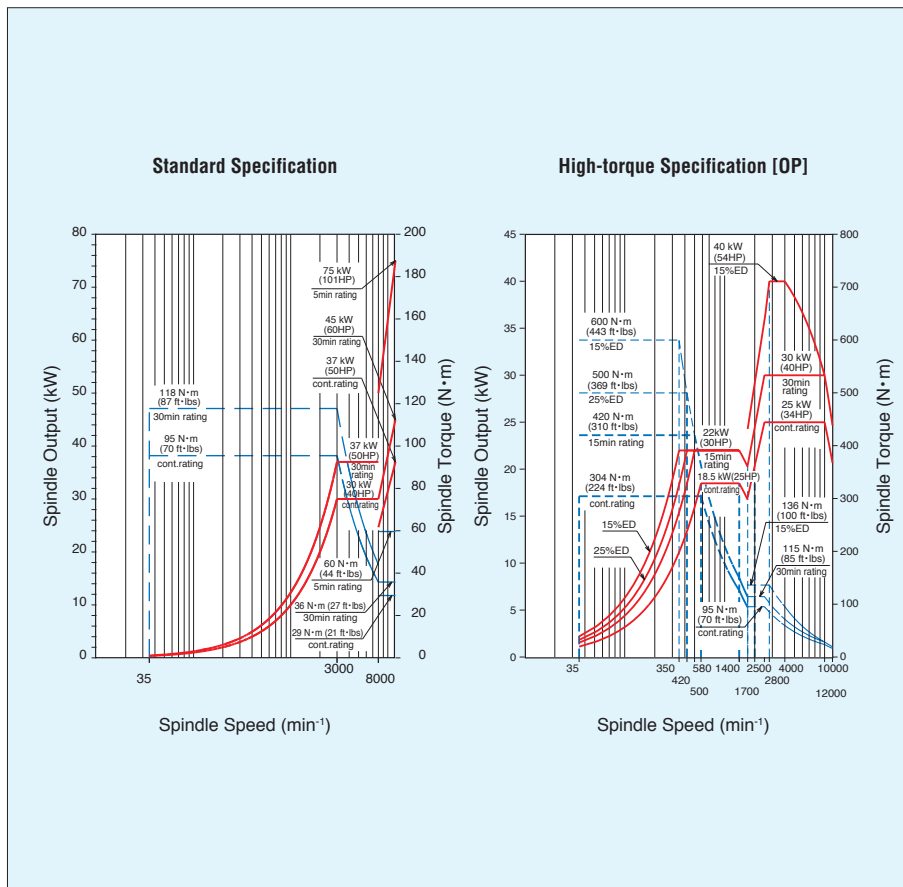

### Circular Cutting Accuracy mm (inch)

Item	OKK tolerance	Result
Circularity	0.015 (0.00059")	KCV800-5AX: 0.0056 (0.00022") KCV1000-5AX: 0.0058 (0.00023")

## Spindle Output and Torque Diagram (FANUC)

Remarks  
 ※1: The above sample data shows a short-time machining example and the results of continuous machining may differ from them.  
 ※2: The above sample data shows the accuracy under OKK's in-house cutting test conditions. The results may vary with the conditions of the cutting tools and fixtures.  
 ※3: The accuracy shown above are values obtained based on OKK's inspection standards under the conditions that the machine is installed according to OKK's foundation drawing and the ambient temperature remains constant.

## Machining Capabilities (Workpiece material: S45C)

	Face Mill 5"×6 t	Roughing End Mill φ50 (φ1.97")×6 t	Roughing End Mill φ50 (φ1.97")×6 t
Spindle speed	300min <sup>-1</sup>	160min <sup>-1</sup>	160min <sup>-1</sup>
Cutting speed	120m/min (4724ipm)	25m/min (984ipm)	25m/min (984ipm)
Cut width	(A) 100mm (3.94")	(C) 50mm (1.97")	(E) 50mm (1.97")
Cut depth	(B) 3mm (0.12")	(D) 5mm (0.20")	(F) 5mm (0.20")
Feed rate	300mm/min (12ipm)	140mm/min (6ipm)	192mm/min (8ipm)
Feed per tooth	0.167mm/tooth (0.00657inch/tooth)	0.146mm/tooth (0.00575inch/tooth)	0.200mm/tooth (0.00787inch/tooth)
Cutting amount	90cm <sup>3</sup> /min (5.5cu-inch/min)	35cm <sup>3</sup> /min (2.1cu-inch/min)	48cm <sup>3</sup> /min (2.9cu-inch/min)
Spindle motor load	129%	100%	111%

Note 1: The above machining data show a sample actual machining and are for reference only.

	Controller type		F30i	F30i	

\*1: When the supply voltage is 220VAC, the supply frequency of 60Hz only is applicable.  
\*2: Purity of the supplied air should be equivalent to Class 3.5.4 specified in ISO 8573-1 / JIS B8392-1 or higher.  
\*3: The flow rate for the standard specification machines is specified in the above.  
When optional specification such as an air blow is added, add the corresponding air supply according to the operating frequency.

Standard Accessories		KCV800-5AX	KCV1000-5AX
Item	Q'ty		
Lighting system (Two fluorescent lamps)	1 set	1 set	
Coolant unit with lift-up type chip conveyor (for backwashing aluminum chips)	1 set	1 set	
Coolant-through-spindle (Spindle compatibility only)	1 set	1 set	
Entire machine cover (Splash guard)	1 set	1 set	
Door inter-lock	1 set	1 set	
Top cover	1 set	1 set	
ATC shutter (operated automatically)	1 set	1 set	
Slideway protection covers for X, Y and Z axes	1 set	1 set
